

TERVISEAMET

EXPERT COMMITTEE OF BORDERLINE PRODUCTS

DECISION

Tallinn

18.03.2021

A description of the product:

Products name: „BioBlock“

Nasal spray with bovine antibodies against SARS-CoV-2

Manufacturer: AS Chemi-Pharm

Ingredients: Purified water, bovine antibody water solution in DPBS-s (without Ca and Mg salts), PEG400 (polyehtylenglycol), glycerol, PVP K30 (polyvinylpyrrolidone), sodium benzoate, citric acid, salts found in the buffer.

The recommended dosage: up to 4 sprays during one usage – 1-2 sprays to each nostril. Use the spray 3-4 times a day, and before and after visiting crowded places. It is also recommended to use it again after blowing the nose.

Considering the decision of expert committee of borderline products:

„BioBlock“ is classified as a product, for which the following legislation is applied: Consumer Protection Act, Product Conformity Act and Advertising Act.

Explanation. The Expert Committee on Borderline Products is a co-operation and working body established by Directive No. 1-1.1 / 12 of the Director General of the Health Board of 31.01.2008 “Establishment of an Expert Group on Defining Borderline Products” responsible for defining borderline products according to product composition, instructions for use, labeling, etc., publishing decisions on the Health Board's website and supporting cooperation between the following national authorities: Health Board, Consumer Protection and Technical Regulatory Authority, Agency of Medicines, Agriculture and Food Board. This Protocol Decision is not legally binding and does not regulate any rights or obligations on anyone.
